Brookhurst Wood Landfill Site Permit number EPR/BV9896IY

Introductory note

This introductory note does not form a part of the notice

Under the Environmental Permitting (England & Wales) Regulations 2016 (schedule 5, part 1, paragraph 19) a variation may comprise a consolidated permit reflecting the variations and a notice specifying the variations included in that consolidated permit.

Schedule 1 of the notice specifies the conditions that have been varied and schedule 2 comprises a consolidated permit which reflects the variations being made.

Brookhurst Wood Landfill Site was originally a clay pit until landfilling commenced in 1993. It is located at National Grid reference TQ 17275 35065 approximately 4 kilometres north of Horsham and 12 kilometres to the southwest of Gatwick airport and is situated in a semi-rural area surrounded by arable farmland and woodland. Horsham railway line runs along the western perimeter of the site.

The Site comprises various engineered containment Phases 1 to 6. Warnham landfill site is a restored Cleanaway Limited's landfill which abuts Brookhurst Wood landfill on the southern boundary, both areas were consolidated into one permit after Biffa Waste Services Limited took over Warnham landfill site area from Cleanaway Limited.

The Site is a non-hazardous landfill site. It is now capped and being restored. The Site ceased taking waste in October 2018, capping was completed in December 2018 and the placement of restoration soils is currently ongoing.

This variation allows:

- increase in leachate level compliance limits in both the leachate monitoring wells and sumps,
- changes in the compliance limits for groundwater quality for some of the parameters,
- the addition of action and compliance limits for methane and carbon dioxide levels for some Warnham landfill perimeter gas boreholes,
- some revision to the monitoring requirements in accordance with the latest landfill permit template, and
- addition of EWC code 19 12 12 to Table S2.3 Permitted waste types for restoration.

The schedules specify the changes made to the permit.

The status log of a permit sets out the permitting history, including any changes to the permit reference number.
